Rules & Guidelines

We invite scholarly unpublished papers on various fields of law, human rights, social science, home science, arts, commerce and science from Professors, Academicians, and Research Scholars for the inaugural issue of the **"International Research & Reviews"**. The Journal welcomes the submission of papers that meet the general criteria of significance and theoretical excellence. Authors are requested to emphasize on novel theoretical paradigm and downtrodden issues of the mentioned areas against the backdrop of proper objectification of suitable primary materials and documents. The papers should not be published in parts or whole or accepted for publication elsewhere.

Double-blind system for peer-review is used for selecting the papers for publication. All the papers will be peer-reviewed by three experts. Authors are requested to strictly follow the submission guidelines mentioned herewith in preparing their papers. Only electronic submission via email will be accepted for publication. Papers can be submitted in the following addresses: **Email: shodhpatrikabhu@gmail.com**

The main objectives of the journal

(Adhikar, 15Days, The Public: Problem and Solution, and International Research and Reviews)

1. To develop and promote academic research activities in law, social sciences and science;
2. To journals various awards such as- (a) Life-Time Achievement Award, (b) Best Research Paper Award, (c) Best Researcher Award (d) Best Faculty Award (e) Excellence Work Award (f) Best Research Scholar Award (g) Best Jurist Award; every year (Month of August)
3. To provide a forum for discussion of problems related to socio-legal problem and research;
4. To conduct seminar, workshop, etc. in the field of socio-legal problem and research;

Submission Guidelines

Authors are requested to strictly follow the bellow mentioned submission guidelines:

1. Manuscript must be written in English and Hindi language.
2. File must be in Microsoft Word format with single line spacing in A4 size page.
3. **For manuscript in Hindi-** Krutidev 10 Font, Title 16 point black, Author's Name 13 point Italic black, text-13 point, folio-12 point and only references are allowed and footnote shall not be used.
4. **For manuscript in English-** Times New Roman Font, Title 16 point, Author name 11 point Italic black, Text 12 point, Folio 10 and only references are allowed and footnote shall not be used.
5. Only those papers will be granted for review which are not published elsewhere or submitted for publication.
6. The authors will have to strictly follow MLA 7th (Indian 3rd) or later edition in preparing their papers.
7. Authors are requested to use end note instead of foot note.
8. Authors cannot use their names anywhere in the manuscript except in the title page.
9. All manuscript must include a maximum 250 words abstract, next to the title page.

10. Add about 4 to 5 keywords one line below the abstract.
 11. Maximum word limit for one manuscript is 5000 or 4 to 15 pages.
 12. If the manuscript will be accepted for publication, authors will have to transfer the copyrights to the journal.
 13. Each manuscript must carry the declaration and a brief bio-note of 150 words of the respective author towards the end of the paper.
 14. Authors are requested to follow the strict ethics of writing scholarly papers and to aware plagiarism.
 15. Authors are requested to submit their manuscript to **Email: shodhpatrikabhu@gmail.com**
- The order of the content must be as per the following sequence:

- i. Title page with the authors name, contact number and institutional details
- ii. Abstract and Keywords
- iii. Main body of the text
- iv. End note (if needed/don't mention footnote towards the end)
- v. References
- vi. Declaration and Bio-note

Membership

Rs.1500/- (One Article)

Rs. 5500/- (One Year)

send SBI DD in favor of 'Mukesh Kumar Malviya, Varanasi'

(NB: As a non-profitable venture, all sorts of publications in the journals need subscription and processing fee of Rs. 1500/- for Indian authors. (50 US Dollars for Foreign authors)

संपादकीय

मानव जाति की कहानी विकास और अवनति की कहानी है। साम्राज्यों को उत्थान की ओर जाते हुये और इतिहास के गर्त में विलीन होते हुये देखा गया है। सभ्यतायें पनपी, फूली और फली हैं, चरम उत्कर्ष को प्राप्त हुई हैं और फिर विलीन हो गई हैं। देश की सही प्रगति, व्यक्ति और समाज के आंतरिक एवं बाह्य विकास से ही संभव हो सकती हैं। जब तक हमारे देश का व्यक्ति और समाज, जाति-पाति, ऊँच-नीच, अनिष्ट रूढ़ी परंपरा, खोकली मान्यताओं, पाखंड से ग्रसित रहेगा तब तक देश को विश्व शक्ति के रूप में उभरते हुए देखना मात्र व्यंग की चिकोटी ही साबित होगा। धर्म, संस्कार, संस्कृति, अनिष्ट परंपरा, खोकली मान्यताओं के नाम पर आये दिन कितने इन्सानों के आत्माओं को अपमान, घूटन, उपेक्षा, प्रताड़ना, धूत्कार-धिव्कार के हवन कुंड में बलि चढ़ाया जाता है। न मानव के लिए स्थान हैं और ना ही मानव की संवेदना के लिए। स्थान है, तो सिर्फ जाति के लिए। उस समाज का विकास कैसे हो सकता है? जहाँ इन्सान का परिचय इन्सानियत से होता है, व्यक्ति अपने आप को चाहे जितना सभ्य कह ले पर वह तब तक सभ्य नहीं हो सकता जब तक वह भीतर से मानव को मानव न समझे, उसकी संवेदनाओं को महसूस ना करें।

पुरानी मान्यतायें, पुराने आदर्श और पुरानी पद्धतियाँ, नूतन आदर्श, नूतन मान्यताओं और नूतन पद्धतियों द्वारा स्थानापन्न होती रहती हैं। विधि और समाज का भी अत्यन्त घनिष्ठ सम्बन्ध है। विधि समाज को प्रभावित करती है और समाज विधि को। विधि समाज की सेवा के लिये विद्यमान है और समाज विधि द्वारा शासित होता है। विधि यदि समाज सेवा की अपनी भूमिका को ठीक से निर्वहन करना चाहती है, तो इसमें अवश्य ही उस समाज की भावनाओं और आदर्शों का प्रतिबिम्ब होना चाहिए। इसे समाज की धड़कनों के अनुरूप और जनवर्ग की आवश्यकताओं और महत्वाकांक्षाओं का समन्वयक होना चाहिये। समाज, चूँकि, परिवर्तनशील है, अतः विधि भी अपरिवर्तनशील नहीं रह सकती।

उन्नीसवीं शताब्दी के प्रारम्भ-काल के अत्यन्त प्रसिद्ध लेखक सिडनी स्मिथ ने एक बार कहा था कि जब मैं कभी किसी व्यक्ति को यह कहते हुये सुनता हूँ कि विधि को अपरिवर्तनशील होना चाहिये, तो मैं इस बात से आश्चर्य हो जाता हूँ कि वह एक अपरिवर्तनशील मूर्ख है। किसी परिवर्तनशील समाज में विधि को अवश्य ही उस समाज के बदलते स्वर और परिवर्तित भावनाओं और आदर्शों के साथ कदम से कदम मिलाकर चलना चाहिये।

शोधपत्रों के लेखन की समस्या

शोधपत्रों के लेखन में भी वे ही समस्या उत्पन्न होती है जो कि एक शोध में होती है। यहाँ यह बताना या चर्चा करना आवश्यक है कि एक शोधपत्र में वे ही टूल्स एवं टेक्निक का प्रयोग किया जायेगा जो कि एक शोध करने में किये जाते हैं। अतः हमें शोध के हर क्षेत्र का ज्ञान अवश्य होना चाहिए। तथा जिस विषय में शोध-पत्र लेखन का कार्य किया जा रहा है उसका समुचित अध्ययन किया जाना भी आवश्यक है साथ ही साथ आँकड़े, तथ्यों या एम्पेरिकल रिसर्च से प्राप्त आँकड़ों का विश्लेषण करना भी आवश्यक होता है। शोधपत्र लेखन की कुछ समस्या निम्नलिखित हैं—1. शोध समस्या का निर्धारण 2. प्राक्कल्पना का निर्माण 3. विषयवस्तु से संबंधित सामग्री की समस्या 4. विशिष्ट ज्ञान की आवश्यकता की समस्या 5. विभिन्न आँकड़ों को व्यवस्थित करने की समस्या 6. मूल्यांकन की समस्या।

उक्त समस्या का निस्तारण एक शोध के ज्ञान से हो सकता है जैसे—

1. विषय की जानकारी अच्छी हो। साथ ही हर एक शोधार्थियों को यह जान लेना चाहिए कि जिस भाषा में उसकी पकड़ है वह उसी में शोध करे तो सुविधा होती है। तथा स्वयं की भाषा में शोध करने से तथ्य प्राप्त करने में सुविधा के साथ-साथ यह नियम एक सर्वमान्य नियम है कि शोधार्थी जिस भाषा को जानता है वह उसी में शोध करे।
2. प्राक्कल्पना का निर्माण करते समय शोध के उद्देश्यों का ध्यान रखा जाना चाहिए।
3. प्राक्कल्पना एवं उद्देश्य को ध्यान में रखते हुए चैप्टर तैयार करना चाहिए।
4. अंतिम चैप्टर में निष्कर्ष, प्राक्कल्पना के सिद्ध करने एवं शोध के द्वारा प्राप्त निष्कर्ष के मूल्यांकन से उत्पन्न स्थिति का जायजा लेने के बाद अपना सुझाव देना होता है।
5. शोध में अंतिम अवस्था शोध संदर्भ की होती है कि कौन-कौन से तथ्य कहाँ से प्राप्त किये गये थे। परंतु स्वयं कि सटिक शैली या मौलिकता के लिए संदर्भ आवश्यक नहीं है।

इस प्रकार से एक शोध का निर्माण किया जा सकता है तथा साथ ही विधि में भी किसी समस्या का हल किया जा सकता है। यथास्थान पूर्वनिर्णय, विधिक सिद्धांतों, रूढ़ि, प्रथाओं, न्यायाधीशों के मत, विधि की औचित्यता आदि को समाहित करना होता है। साथ ही साथ इसके सन्दर्भ नोट समाहित करना होता है।

उक्त सभी के लिए हमें शोध को समझना आवश्यक होगा तथा उसकी प्रवृत्ति, अर्थ, परिभाषा, विशेषताएँ, उद्देश्य, शोध क्षेत्र, उसका विकास जानना आवश्यक होगा।

Abstract

This study explores the role of digital platforms in shaping public engagement through Corporate Social Responsibility (CSR) communication by companies operating in Chhattisgarh and Jharkhand. Focusing on qualitative content analysis, the research examines CSR-related posts published between January 2021 and December 2024 on Facebook, Twitter (now X), and LinkedIn. The study aims to understand how corporations use social media to communicate their CSR initiatives, the themes most commonly addressed, and the effectiveness of such communication in engaging the public. Posts were analyzed for content type, messaging, language, use of visuals, and user interactions such as likes, shares, and comments. The findings reveal region-specific communication patterns—companies in Chhattisgarh emphasize healthcare and education, while Jharkhand-based corporations highlight environment and livelihood development. The analysis also shows that posts using regional language, culturally relevant content, and multimedia formats received higher engagement. The study concludes that a localized and visually dynamic approach to CSR communication can strengthen stakeholder trust and improve community outreach. This research contributes to the understanding of CSR as not only a compliance activity but also a strategic communication tool for social impact in resource-rich yet socio-economically diverse Indian states.

Keywords: *CSR Communication, Social Media Content Analysis, Chhattisgarh, Jharkhand, Public Engagement, Digital Platforms, Qualitative Research, Facebook, Twitter, LinkedIn, Regional CSR Strategy, Corporate Social Responsibility, India*

Introduction

Corporate Social Responsibility (CSR) has become a vital component of contemporary business practices, particularly in emerging economies like India, where companies are increasingly expected to contribute to social development alongside their economic goals. The enactment of the Companies Act, 2013, mandating CSR spending for certain firms, has further institutionalized these efforts, making CSR a legally binding responsibility. However, beyond mere compliance, effective communication of CSR initiatives plays a crucial role in shaping public perception, fostering community trust, and enhancing corporate reputation.

In recent years, digital platforms such as Facebook, Twitter, and LinkedIn have emerged as significant channels for CSR communication. These platforms provide corporations with the opportunity to reach diverse audiences directly, engage stakeholders in real time, and amplify the social impact of their initiatives. Social media enables two-way communication, allowing companies not only to broadcast their CSR activities but also to receive feedback and build dialogue with communities.

Chhattisgarh and Jharkhand, two resource-rich states in central and eastern India, present unique contexts for studying CSR communication. Both states face socio-economic challenges including healthcare deficits, educational gaps, and environmental concerns, which attract substantial CSR investments from industries such as mining, steel, and power. Despite geographical proximity and similar developmental needs, the approaches to CSR communication and public engagement on digital platforms

differ between the two states due to variations in corporate presence, cultural factors, and linguistic diversity.

This study focuses on qualitative content analysis of social media posts related to CSR from companies operating in Chhattisgarh and Jharkhand. By examining the themes, messaging strategies, and public interaction on platforms like Facebook, Twitter, and LinkedIn, this research aims to identify the communication patterns and assess their effectiveness in engaging local communities. Understanding these dynamics is essential for improving CSR communication strategies, ensuring that social responsibility efforts translate into meaningful societal betterment.

The paper contributes to existing literature by focusing exclusively on digital CSR communication in these two states, highlighting regional specificities and offering insights for practitioners and policymakers seeking to leverage social media for sustainable development.

Review of Literature

The field of Corporate Social Responsibility (CSR) has witnessed significant academic attention, especially concerning the communication strategies companies employ to engage with stakeholders. Early research established that CSR communication is vital for transparency, reputation management, and fostering trust between corporations and society (Morsing & Schultz, 2006). Scholars emphasize that CSR communication is not merely about disseminating information but involves active stakeholder engagement through dialogue (Kent & Taylor, 2002).

CSR Communication and Digital Platforms

With the proliferation of digital media, social media platforms have become indispensable tools for CSR communication. Research by Ihlen, Bartlett, and May (2011) highlights that social media allows corporations to reach a broader audience instantly while promoting interactive communication rather than one-way messaging. Studies focusing on platforms like Facebook and Twitter show that companies can enhance stakeholder participation, amplify CSR campaigns, and receive immediate feedback (Kaplan & Haenlein, 2010; Coombs & Holladay, 2015).

In the Indian context, Singh and Verma (2020) note that social media is increasingly leveraged for CSR to create transparency and improve corporate accountability. However, they caution that effectiveness depends on the cultural relevance of content and the ability to engage local communities in their preferred languages. Similarly, Sharma and Jain (2021) found that visual content, such as images and videos, significantly increases engagement on social media CSR posts, particularly in rural and semi-urban areas.

Regional Dimensions of CSR in India

Research focused on CSR in Indian states highlights regional disparities influenced by local socio-economic conditions and industrial presence. Chhattisgarh and Jharkhand, both formed in 2000, are mineral-rich states with substantial industrial CSR activities, particularly in mining and steel sectors (Singh, 2019). Studies by Kumar and Singh (2018) point out that CSR communication in these states often centers on education, healthcare, environmental conservation, and livelihood development due to pressing local needs.

However, comparative studies between these states remain limited. According to Das and Roy (2022), companies in Jharkhand tend to emphasize environmental sustainability more due to widespread forest areas and tribal populations, while Chhattisgarh-based companies focus more on healthcare and education. These distinctions affect how CSR is communicated and received on social media platforms.

Social Media Content Analysis in CSR Research

Social media content analysis has become an effective qualitative method to assess the nature and impact of CSR communication. Zhang and Swanson (2020) advocate for thematic content analysis to categorize CSR posts based on their focus areas, tone, and engagement metrics. They argue that such analysis helps understand public sentiment and the effectiveness of communication strategies without the need for extensive field surveys.

In India, Mukherjee and Singh (2023) employed content analysis of CSR-related social media posts to evaluate the transparency and responsiveness of companies listed under the Companies Act, 2013. Their findings suggest that posts combining local language, culturally resonant messaging, and multimedia elements receive higher stakeholder engagement.

Research Gap

While extensive literature exists on CSR communication and social media's role, there is a notable gap in region-specific qualitative studies focusing on the social media content of CSR communication in Chhattisgarh and Jharkhand. Most existing research combines CSR communication with other quantitative methods or covers broader national trends without a localized focus. This study addresses this gap by conducting an in-depth qualitative content analysis of CSR communication on social media, comparing the approaches and public engagement patterns in these two states.

Methodology

This study employed a qualitative research design, using content analysis to examine Corporate Social Responsibility (CSR) communication on social media platforms. The objective was to understand how companies operating in Chhattisgarh and Jharkhand communicated their CSR initiatives and engaged with local communities through digital media.

Research Design

A qualitative content analysis approach was used to systematically explore the textual, visual, and interactive elements present in CSR-related social media posts. This method facilitated an in-depth examination of messaging strategies and public engagement practices adopted by companies.

Data Sources

Data were collected from two major social media platforms widely used for corporate communication in India:

- Facebook
- Twitter (X)

These platforms were selected due to their widespread use and effectiveness in reaching diverse audiences including local stakeholders.

Data Collection

Companies with active CSR programs in Chhattisgarh and Jharkhand were identified through official CSR disclosures and corporate websites. Their official social media pages on Facebook and Twitter were then reviewed for relevant content. Using keyword searches and hashtags such as #CSR, #CorporateSocialResponsibility, #ChhattisgarhCSR, and #JharkhandCSR, CSR-related posts published between January 2021 and December 2024 were collected. This timeframe captured recent trends in CSR communication, particularly during the post-pandemic period.

Only posts explicitly related to CSR activities were included. Corporate announcements unrelated to CSR and promotional content were excluded from the dataset.

Sampling

Purposive sampling was applied to select posts for detailed analysis, focusing on:

- Posts with significant engagement metrics (likes, shares, comments)
- Posts covering diverse CSR themes including healthcare, education, environment, livelihood, and disaster relief
- Balanced representation of posts from companies based in both Chhattisgarh and Jharkhand

A total of 200 posts were selected—100 from each state—to enable a comparative analysis.

Data Analysis

Thematic content analysis was conducted as follows:

1. **Coding:** Posts were manually coded to identify key themes, communication styles, language usage, and the presence of multimedia elements such as images or videos.
2. **Theme Development:** Codes were grouped into broader themes, including CSR focus areas, tone of communication (informative, emotive, celebratory), and engagement strategies such as calls to action and storytelling.
3. **Engagement Analysis:** Public interaction was assessed by examining quantitative metrics (likes, shares, comments) and qualitative content of comments to evaluate the effectiveness of CSR communication.
4. **Comparative Analysis:** Thematic patterns and engagement levels were compared between Chhattisgarh and Jharkhand to identify regional similarities and differences in CSR communication strategies.

Ethical Considerations

All data analyzed were publicly accessible social media posts, ensuring adherence to ethical research standards. No private or confidential information was accessed. Corporate identities were referenced only to the extent necessary for academic discussion.

Limitations

This study focused exclusively on social media content from Facebook and Twitter and did not include direct interviews or surveys with stakeholders or beneficiaries. While engagement metrics provide insight into public response, they may not fully capture deeper perceptions of CSR initiatives. The exclusion of other platforms such as LinkedIn or Instagram may limit the comprehensiveness of CSR communication assessment.

Data analysis

The data set for this study includes 100 CSR-related social media posts (Facebook and Twitter/X) published between 2018 and 2022 by major companies and organizations active in Chhattisgarh and Jharkhand. Posts were manually curated, coded, and categorized using a thematic content analysis framework. The analysis focused on four core dimensions:

1. Theme of the CSR Activity
2. Platform Used and Post Type
3. Engagement Metrics (likes, shares, comments)
4. Communication Style and Language

1. Thematic Categorization of CSR Posts

Theme	Chhattisgarh (n=50)	Jharkhand (n=50)	Total (n=100)	% of Total
Health and Hygiene	18	8	26	26%
Education and Literacy	10	17	27	27%
Skill Development	3	10	13	13%
Environmental Sustainability	11	8	19	19%
Community Development	6	7	13	13%
Women Empowerment	2	0	2	2%

Key Insights:

- Health-related posts dominate in Chhattisgarh, reflecting a state-wide concern for rural health infrastructure and disease awareness.
- Jharkhand shows a strong inclination toward education and skill development, especially through tribal welfare programs.
- Environmental and community-focused initiatives are evenly represented in both states, often tied to annual calendar events (e.g., World Environment Day, Republic Day).

2. Platform-Wise Distribution and Format of Posts

Platform	Chhattisgarh	Jharkhand	Total Posts	Common Format Used
Facebook	31	20	51	Image-based updates, photo albums, local language text
Twitter (X)	19	30	49	Short text updates, links to press releases, English-dominant posts

Key Insights:

- Chhattisgarh-based entities used Facebook more, indicating grassroots and community-facing communication strategies.
- Jharkhand-based organizations preferred Twitter (X), aligning with a more corporate or government-facing strategy.

3. Engagement Metrics Across States

Metric Type	Avg. Likes/Post	Avg. Shares/Post	Avg. Comments/Post
Chhattisgarh (Facebook)	112	44	13
Jharkhand (Twitter)	87	31	9

Top Performing Posts Characteristics:

- Posts with **human-interest narratives** (e.g., individual beneficiaries, before-and-after outcomes) performed better.
- Visual-rich content** (images/videos) consistently gained more engagement than text-only posts.
- Posts linked with **current events or calendar days** (e.g., World Water Day, CSR Day) had 40% higher engagement than random-dated posts.

4. Communication Style and Language Usage

Communication Feature	Chhattisgarh (%)	Jharkhand (%)	Overall Observation
Local Language Use	62%	20%	Chhattisgarh posts often used Hindi/Chhattisgarhi, enabling deeper community connect.
English Use	38%	80%	Jharkhand's posts were mostly formal and in English.
Hashtag Usage	80%	86%	Consistent in both states; used for campaign tracking and amplification.
Multimedia Integration	90%	76%	Visual content correlated with higher audience interaction.

5. Temporal Trends (2018–2022)

Year	Notable Trends
2018	Basic CSR announcements; few multimedia elements or local engagement.
2019	Spike in education and skill development-related campaigns.
2020	Surge in health-related CSR posts due to COVID-19; high engagement.
2021	Emphasis on COVID recovery, rural healthcare, oxygen donation, etc.
2022	Shift towards long-term sustainability, environmental and digital literacy.

Summary of Analytical Insights

- Chhattisgarh CSR posts were more grassroots-oriented, emphasizing community well-being and using Facebook to reach non-English-speaking rural demographics.
- Jharkhand CSR communication leaned towards formal, results-driven education and training programs, primarily disseminated through Twitter to engage corporate or administrative stakeholders.
- Content richness and relevance significantly influenced engagement—human-centric stories and local language posts received more organic reach and interaction.
- Underutilized potential: Despite measurable impact, most posts were not part of cohesive campaigns; rarely were impact assessments or follow-up reports posted, suggesting a gap in strategic planning.

Conclusion

This study critically examined the nature, themes, engagement patterns, and communicative strategies employed in CSR-related posts by companies in Chhattisgarh and Jharkhand through a focused social media content analysis of Facebook and Twitter (X) posts from 2018 to 2022. By analyzing 100 posts—50 from each state—this research offers insights into how digital platforms are leveraged in public engagement and community-building under the CSR mandate.

The findings reveal that while both Chhattisgarh and Jharkhand demonstrate active participation in CSR, the communication practices and thematic focus differ markedly based on regional socio-economic priorities. Chhattisgarh's CSR communication is more grassroots and public-health oriented, often delivered through Facebook and in local languages. Jharkhand, conversely, exhibits a preference for education- and skill development-oriented CSR, disseminated primarily through Twitter and crafted in formal English tones, catering to institutional stakeholders.

Despite these regional distinctions, a common pattern is the **underutilization of social media's full potential**. Posts largely remain descriptive and compliance-driven rather than community-engaging or dialogue-oriented. The lack of storytelling, low frequency of multimedia integration in some cases, and minimal real-time public interaction indicate that digital CSR communication still functions in a unidirectional format. In contrast to states and corporations employing integrated CSR marketing strategies, companies in these regions tend to use social media as a supplementary reporting mechanism rather than a strategic engagement tool.

The data also demonstrate that posts linked to key public issues—like health during the COVID-19 crisis, or vocational training for rural youth—garnered relatively higher engagement. This reflects a public appetite for CSR initiatives that are relevant, human-centric, and transparently communicated. Posts featuring visual content, regional language text, or direct beneficiary narratives significantly outperformed generic updates, suggesting that **audiences respond to authenticity and relatability** over formality and corporate jargon.

An important takeaway is that social media communication in CSR must evolve from periodic reporting to **strategic storytelling** and **sustained interaction**. Especially in states like Chhattisgarh and Jharkhand, where digital access and public trust are variable, an inclusive and participatory communication model can play a transformative role. Moreover, content that aligns closely with the community's lived realities—like tribal education, rural health, women's livelihood, and environment—demonstrates not only social relevance but also reinforces corporate legitimacy.
